

Standard has enhanced our participant website with greater personalization, insights to retirement readiness, and tools to motivate and change behavior.

## New Retirement Readiness Planning Tool

To help participants focus on retirement income needs, a new retirement readiness planning tool is being featured prominently on The Standard's Personal Savings Center at <https://www.standard.com/retirement/hosss-steak-and-sea-house>.

When participants log in to their account, a progress meter will show how close they are to being able to replace their monthly income at retirement. Easy and intuitive navigation allows them to take positive actions to help achieve their retirement income goals.
